

BIOTOUG USER GUIDE FOR TOMATOES

Prevention : To protect plants and trees from fungal diseases (Fusarium, Rhizoctonia), apply Biotoug 15 days before planting by mixing it into the soil (in greenhouses: 1-2 kg per 400 m²). This method effectively prevents infection.

Treatment : Biotoug treats infected plants and trees and protects them from fungal diseases (Fusarium, Rhizoctonia) through two methods: irrigation or spraying.

STAGE	TIMING (DAYS AFTER PLANTING)	APPLICATION METHOD	DOSAGE
PLANT PREPARATION	After planting	Mix Biotoug with the organic material	20g Biotoug /1 kg organic substrate
TRANSPLANTING	20-30 days	Soak the roots in Biotoug solution before planting	2kg / 400 L
VEGETATIVE GROWTH	40 days after transplanting	Apply to soil every 2-4 weeks by irrigation or spraying	2kg / 400 L
FLOWERING	50 days	Apply to soil to enhance root disease resistance	2kg / 400 L
FRUITING	77 days	Soil protection against pathogens	2kg / 400 L
MATURATION	100 days	Biotoug remains active in the soil	2kg / 400 L
